DIARY NOTES

DD/S

11 January 1966

1. The DCI and Dr. Wheelon visited the Foreign Technology Division at Wright-Patterson Air Force Base for a briefing on the activities of this Division. The FTD officers suggested to the DCI that they have a direct secure communications link between their offices and the Agency. I discussed this with Dr. Wheelon who advised that Commo should take no action at this time inasmuch as certain administrative - political - considerations are involved and the approval of DIA is necessary before we move in this direction. I so advise [REDACTED] Director of Communications, on the above, but he is to take no action until further advised.
